Professional Summary

I studied Information Technology at UTN (Universidad Tecnológica Nacional). I am currently working at a fintech, where I focus on backend development of solutions using SOA architecture, DDD, TDD, and REST, with knowledge in Java/Spring Boot, PHP/Laravel, C#/.NET, and Python/FastAPI. Previously, I participated in work simulations that strengthened my problem-solving and teamwork skills, and I also completed internships where I applied these practices in real projects. I first began programming in 2021 as a personal interest, which allowed me to develop projects that laid the foundation for my professional path. I have also worked with frontend technologies based on server-side rendering such as Thymeleaf, Vaadin, Bootstrap, and TypeScript.

Technical Skills

- **Languages & Frameworks:** Python (FastAPI, SQLAlchemy, Flet), Java (Spring Boot, Hibernate, Vaadin, Thymeleaf templates), PHP (Laravel, Blade templates, Eloquent), Typescript, JQuery, , C# / .NET, Bootstrap, HTML/CSS.
- **Databases:** MySQL, PostgreSQL, BigQuery (design, ER diagrams, queries, stored procedures, triggers, normalization/denormalization, optimization, CLI).
- **Tools & IDEs:** Git, Docker, Kubernetes, Postman, Swagger/OpenAPI, Visual Studio, Visual Studio Code, GitHub, Bitbucket, Jira, Trello, Notion.
- **Architectures & Patterns:** REST, Service-Oriented Architecture, MVC, DDD, TDD, Clean Architecture, Event/Listener, Observer, IoC, Builder, SOLID, KISS, YAGNI, DRY Principles.
- **Networking & Security:** Cybersecurity tools (Kali Linux, Nmap), vulnerability analysis, SQL injection prevention, secure authentication and authorization flows, routing, VLAN, SSH.
- **General Programming Knowledge:** WebSockets, command creation, queued jobs, authentication/authorization, JWT, validation, i18n, migrations, notifications & email, file storage.

Professional Experience

Software Developer – Reyesoft

04/2024YYY – Present | On-site, Argentina

- Developed a full-featured digital wallet (deposit, withdrawal, conversion, transfer) using Laravel/Blade. [Saldoar](#)

- Implemented KYC compliance processes with [Veriff](#)
- New currencies (e.g., Brazilian Real) and third-party liquidity providers integration.
- Created tax reporting tools and internal dashboards for customer support. [Fisconexo](#)
- Built RFM-based tools for marketing optimization.
- Users/transactions state-changes broadcasting.
- Product discoveries focused on improving processes for a product that provides tools for hotel and short-term rental property owners. [Bookhap](#)

Software Developer – No Country (Work Simulation)

02/2024 | Remote, Latin America

- Built MVP in Java Spring Boot connecting service providers in a DDD/SOA paradigm with clients in a 10-person Agile team.

Software Developer – Savicsoft (Internship)

09/2024 – 10/2024 | Remote, International

- Contributed to a Java Spring Boot carpooling platform with Clean Architecture in a multicultural, English-speaking team.
- Authentication/Authorization, JWT.
- Migrations with Flyway

PC Technical Service – Self-employed

2020 – 2023 | On-site, Argentina

- Provided hardware, OS, and network support for domestic and business clients.

Commercial Sector Roles

2006 – 2020 | On-site, Argentina

- Worked in various commercial roles, strengthening communication, negotiation, teamwork, and customer service skills.

Education & Certifications

- [Associate's Degree in Information Technologies – UTN Regional Faculty of Santa Fe](#)
- [University Certification in Information Security \(UTN\)](#)
- [Google/Coursera Data Analysis Certification](#)

Languages

- English: Intermediate B2
- Portuguese: Intermediate oral/reading (self-taught)
- Spanish: Native
